Restriction/El ction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

1. Claims 1-16 and 18, drawn to the eyeglasses having a strap formed on a

frame, a leash formed to the strap and a collar formed to the leash, classified in Class

351, subclass 156.

II. Claims 17 and 19, drawn to the flexible eyeglass frame, classified in Class

351, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I and II recites limitations not recited in any of the other

invention. The differing limitations make the inventions I and II patentably distinct from

one another, i.e. a reference that anticipates or makes obvious one of the inventions I

and II would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed.
